- Learning New Technologies
- UI/UX Design
- Problem Solving

PROFILE

I am a BICT (Hons) undergraduate at the University of Vavuniya with a strong interest in software development, web technologies and UI/UX. I enjoy learning new technologies and turning ideas into useful digital solutions. I am looking for opportunities to improve my practical skills, work with a team and gain experience in the IT industry.

EDUCATION

Bachelor of Information and Communication Technology (Hons)

University of Vavuniya | Undergraduate

Focused on developing practical knowledge in programming, web development, databases, object-oriented programming and information technology.

PROJECTS

Catcubutu - WordPress Blog Website

A responsive blog website built using WordPress with a focus on clear content presentation, simple navigation and a good reading experience.

catcubutu.com

MNA Fire Systems - Business Website

A professional business website created to present company information, services and solutions in a clear and responsive layout.

mnafiresystems.com

NetForge - Software Project

A software development project included in my GitHub portfolio as part of my practical programming and development work.

github.com/hasindusanjana1-pixel/netforge

CAREER OBJECTIVE

My goal is to grow as an IT professional by gaining real project experience, improving my programming and web development skills, and contributing to useful software solutions. I am especially interested in internship opportunities where I can learn from experienced people and take part in practical projects.
